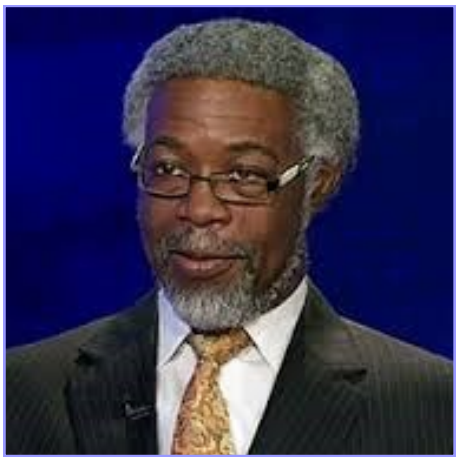
"Conversing with Dr. S. James Gates, Jr. , Theoretical Physicist"

Luna I. Mishoe Science Center South 223

November 7th, 2013 @ 6 p.m.



Dr. Gates will share insights into a prolific career immersed in cutting-edge, interdisciplinary research at the interface of mathematics and physics, specifically, supersymmetry and supergravity - what is sometimes also referred to as a "theory of everything. " Dr. Gates is the first recipient of the prestigious American Physical Society's Edward A. Bouchet Award; and has frequently been featured on PBS television program NOVA as an expert on physics. Dr. Gates is currently Director of the Center for the Study of Terrestrial and Extraterrestrial Atmospheres at the University of Maryland at College Park.

Free and open to the general public.

All are invited.

Refreshments will be served.

Technical Lecture at 11 a.m. in SCS 223
