Event partners

Accelerace partners

Companies

Each track is a 10 min. presentation from each company followed by audience questions

Track 1 - Life Science

NeoHELP: Provides health care professionals with a method for immediate stabilization and resuscitation of preterm and sick newborn infants.

MeQu: Develops a unique fusion fluid warmer that increase survival of patients in critical care situations.

EIR Sciences: Offers epitope and immunogenicity prediction services to filter and screen protein drug leads and select and develop new vaccine candidates.

Cytotrack: The medtech instrument screens a blood sample and detects very rare cells – e.g. 1 circulating cancer tumor cells among 100 mill white blood cells. The instrument hereby provides a non-invasive “liquid biopsy” and combines flow cytometry and scanning microscopy technology.

Intomics: A contract research company combining the knowledge of biology and diseases with advanced informatics to discover new biological insight from existing data. Hereby the number of opportunities and the success rate of drug development research projects for pharmaceutical customers increase.

Track 3 – Cleantech

LeanVent: Makes a game-changing damper for HVAC installations that reduces the system pressure with 50% and thereby reduces power consumption with 50%.

Gridmanager: Makes a grid management system, marketed through utility companies, to professional end-users who need to reduce the power bill.

InVentilate: A proprietary software controlled micro ventilation system for the professional building renovation market.

Sorbisense: Sells patented water quality monitoring systems to consultants and authorities operating in waste-water and groundwater segments

Track 2 - IT

Codesealer: Provides strong and convenient protection for online banking

TracTrac: TracTrac provides gps based live tracking for hard to follow sporting events boosting spectator experience and sponsor value

Anti Sleep Pilot: Preventing fatigue related traffic accidents

Roazz: Makes using and buying software and games as easy as it should be - no installations, run it in the browser and rent instead of buying

GreenTrapOnline: A web platform for monitoring hygiene parameters using proprietary sensors

Track 4 – Consumer products

Watercraft Innovation: Makes a high speed single-handed catamaran that can be transported on the roof-top of a car and be assembled ready to sail in just 15 minutes.

Alfenheim: Develops Porsche branded Premium lifestyle Headphones“

Acorn: Delivering innovative GPS training solutions to improve athlete's performance

Me Mover: Ultimate tools for urban active mobility

About Accelerace and our Investor Day

Every six months Accelerace and Accelerace bio selects 10-15 innovative companies each, which then go through an intense 5 month business development program. At the same time Accelerace Spin-off trawls the nations established companies, to discover, validate and develop promising Spin-out companies. Accelerace invest in the ones we like the most – preferably in syndication with other. Everything is done non-profit to grow and promote the Danish early stage startup scene.
