

# Building ADVANCED SKILLS in DEMENTIA CAREGIVING

with  
Dementia Expert  
**TEEPA SNOW,**  
MS, OTR/L, FAOTA

This session is designed to provide learners with advanced skills and strategies that build on basic skills of a positive physical approach and verbal interaction skills.

These skills will help caregivers match helping behaviors and environmental supports to the stage of cognitive loss the person is experiencing.

Learn about the need to develop a daily program on meaningful and productive activities for the person with dementia. Teepa's workshop will also provide the caregiver with a structured approach to solve 'problematic' behaviors and reduce 'risky' behaviors.

The session will be very interactive with the goal of providing knowledge, skills and attitudes that will change daily outcomes of care.

**February 8, 2013**  
**2pm-5pm**

Location:  
Pines of Sarasota  
Cullers Hall (Administration Bldg.)  
1501 N. Orange Avenue  
Sarasota, FL 34236

**PLEASE NOTE:**

This particular session is for caregivers that have attended a prior Teepa Snow seminar. Attendees are expected to have existing knowledge about dementia and its effects on the brain to allow for an in-depth skills training.

This seminar will be filmed and all attendees will be required to sign a release form before entering the classroom.
