

# Save Time and Money While Pushing Reservoir Data Handling to New Frontiers

**Kraken Webinar**

Wednesday 1<sup>st</sup> May 2013

Wednesday 5<sup>th</sup> June 2013

Wednesday 3<sup>rd</sup> July 2013

Kraken is a powerful cost-effective and time-saving reservoir data manipulation and integration platform, originally developed for a key Brazilian customer by ESSS, South America's leading engineering simulations solutions company.

It features a modern user interface tailored to the visualisation and manipulation of multiple scenarios and data sets from all leading reservoir simulators, with any user workflow.

## TIME/DURATION

1 hour webinar

4:00 PM – 5:00 PM (UK)

## AGENDA

Learn how current Kraken users improve their productivity via:

- Smart properties management
- Workflow automation
- Scripting using Python
- Report creation
- Inspection and comparison of available data
- Scientific visualisation processes, animation and pre-processing
- Independent Simulation

Marcos Damiani, Kraken Product Manager at ESSS will provide an understanding of the challenges that led to the development of Kraken, its features, functionality, and areas of application in Oil & Gas reservoir engineering, including a live demo.

## REGISTRATION

On-line application form:

<http://krakenwebinar13.eventbrite.co.uk>

Organised jointly by ESSS and EnginSoft UK.
